ACTUARIAL EXAMS

Exam P

Sitting July 2026

Exam FM

Planned October 2026

Exam SRM

Planned January 2027

TECHNICAL SKILLS

Actuarial & Analytics: Excel/Google Sheets (pivot tables, VLOOKUP, scenario modeling), SQL (PostgreSQL, MySQL), Python (pandas, numpy, scipy, statsmodels)

Data Engineering & Cloud: Azure Data Lake, Azure Databricks, Azure Data Factory, Power BI, REST APIs

Programming & Tools: Python, SQL, TypeScript, C++, JavaScript, Jupyter, Git, Selenium, Playwright, Pytest

PROFESSIONAL EXPERIENCE

HNTB & FDOT

April 2025 – Present

BI Developer / Data Analyst

- Designed and executed data validation and reconciliation frameworks across Azure ingestion pipelines (ADF → ADLS → Databricks), surfacing 1,000+ data inconsistencies across Bronze and Silver layers — contributing to a ~40% reduction in downstream reporting defects post-release
- Built Python and SQL automation scripts for daily data reconciliation between source systems and reporting layers, eliminating ~60% of manual validation effort and establishing a single source of truth
- Leveraged Azure OpenAI (Foundry models) and self-hosted Ollama LLMs to generate templated test cases and Jira tickets, accelerating test development velocity by 40%+
- Supported ingestion of 20+ enterprise datasets into Azure Data Lake Storage and validated Databricks Spark transformation workflows to ensure SLA-driven reporting accuracy
- Partnered with BI teams to publish curated data marts powering operational and client-facing dashboards for internal and external stakeholders
- Spearheaded automated regression testing using Selenium and Playwright, reducing manual testing time by 10–20% and expanding test coverage across statewide software

Shop Online New York

Feb 2025 – Apr 2025

Software Developer Intern

- Built a cross-platform Flutter application supporting 4 distinct user roles (user, admin, seller, buyer) with role-based access controls, reducing authorization defects and improving navigation clarity
- Integrated Firebase for real-time data management, authentication, and cloud storage; managed end-to-end Jira ticket lifecycle for this workstream

Florida State University

Sep 2023 – May 2024

Cybersecurity Analyst Intern

- Standardized security procedures and compliance controls for FSU Health Research teams, aligning operations to NIST 800-53 and FedRAMP Moderate baselines — reducing audit preparation effort and compliance ambiguity
- Conducted security assessments and risk analysis of Azure and Alert Logic integrations for the Health Data Science Initiative, identifying control gaps across identity, logging, and data protection layers

Mathnasium

Sep 2022 – Aug 2023

Mathematics Tutor

- Delivered individualized math instruction across arithmetic through pre-calculus, improving students' grades by an average of one letter grade through tailored problem-solving strategies
- Prepared students for college admission standardized tests, achieving 20%+ average improvement on math sections — demonstrating ability to translate quantitative concepts into accessible, structured explanations

DATA & ANALYTICS PROJECTS

AI-Driven Test Case Generation Pipeline — *Azure DevOps · Ollama · LLMs*

- Built an end-to-end automated pipeline using the Azure DevOps REST API and self-hosted LLMs (Ollama) to ingest requirements, developer resolutions, and Jira issues and generate templated, reusable test cases
- Linked generated test cases directly to requirements and release versions, improving traceability and per-release test coverage while reducing manual test design effort

SJM Automotive Manufacturing & Dealer Sales Analytics — *Azure Databricks · Power BI*

- Built an end-to-end Azure data platform to ingest, transform, and prepare multi-source enterprise data for analytics; implemented data quality checks and governance controls, feeding reliable Power BI dashboards

Enterprise SLA Monitoring Data Platform — *Azure Databricks · Medallion Architecture*

- Designed a Medallion-architecture pipeline ingesting application decision data into ADLS, applying SLA classification logic in Databricks Spark SQL, and publishing Gold-layer reporting tables for operational and client-facing dashboards
- Implemented automated data validation and reconciliation at each pipeline stage, ensuring end-to-end reporting accuracy and auditability

EDUCATION

Florida State University, Tallahassee, FL.

Dec 2024

B.S. Computer Science

GPA: 3.46 / 4.0

Relevant Coursework: Introduction to Probability, Business Statistics, Calculus I–III, Discrete Mathematics I & II, Data Structures, Operating Systems
